```java
1 package javaassessment;
2 import java.util.Scanner;
3 public class sqrt {
4     public static void main(String args[]) {
5             Scanner s=new Scanner(System.in);
6             int num,sqrt;
7             num=s.nextInt();
8             sqrt=(int)Math.sqrt(num);
9             if (sqrt*sqrt==num) {
10                 System.out.println("TRUE");
11             }
12             else {
13                 System.out.println("FALSE");
14             }
15
16
17     }
18
19 }
20
```

9
TRUE
